

**STARRO
PRECISION PRODUCTS
AND ENGINEERING, LLC**

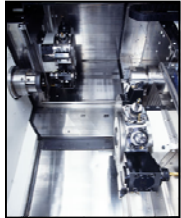

Your Aerospace & Defense Partner for Precision Product Manufacturing

Commitment

Our company commitment is singularly focused on being a valued partner to our customers—expending every effort in operating as an extension of our customers’ internal organization. As a result, we want our customers to leverage our capabilities and resources to improve the scalability of their businesses and expand capacity without incurring significant investment or compromising confidentiality.

Applications

Starro Precision Products and Engineering, LLC is accomplished in providing world-class engineering and machining capability for our Aerospace & Defense OEM partners. Our expertise with advanced materials and micro-precision components provides our customers with a full spectrum of component sourcing solutions for aerospace systems, defense platforms and other critical control related components.

Quality

As your outsourced partner, you can be sure that we will constantly engage our continuous improvement and business excellence programs to reduce system-wide costs, improve upon our manufacturing processes and provide the best in customer and engineering support.
