STARRO  
PRECISION PRODUCTS  
AND ENGINEERING, LLC

Elgin, IL - "Starro Precision Products, Inc.", an Elgin, Illinois-based manufacturer of highly engineered products and components announces the acquisition of Starro by ProLink Investment, Inc. The new company will conduct business from its current facility in Elgin and will operate by the name of "Starro Precision Products and Engineering, LLC".

Starro's President, Bruce Stark, commented on the transition, "I have been very impressed by ProLink's innovative approach to assessing our business and developing a roadmap to success. This all began when I asked ProLink to review our overall business and operating strategies to see how far Starro can grow and improve. The strategic and operational plans that ProLink delivered were robust and creative, I quickly determined that, with their highly capable management team and their access to financial resources, this acquisition would be the best possible solution to unlock our value."

Shapour Arami, CEO and Chief Business Architect of ProLink Investment, Inc., commented that Starro would develop robust and innovative engineering capabilities to meet our most demanding customer requirements. "Starro Precision Products & Engineering, LLC" will be ambitious in the expansion of its portfolio of products and services and focus on quality, timeliness and fast turnaround. "We encourage our customers to leverage our capabilities and resources."

Arami emphasized, "We recognize that the marketplace is dynamic and what our customers truly require is a dynamic partner. We have assembled a great team to meet this challenge. Our Management Team has extensive experience in providing innovative and effective solutions to customer needs as well as having distinguished themselves with acclaim for business excellence and our ultimate goal - delighting customers."

About Starro Precision Products and Engineering, LLC - Starro is an Elgin, Illinois-based company that designs, develops and manufactures high precision and difficult to machine products and components for its medical and industrial customer base to include aerospace, motion control, alternative energy and high technology sectors. Starro Precision Products & Engineering is ISO: 13485 certified for medical devices.
